

Clean Earth Solutions is an environmental firm focusing on the education, prevention and remediation of various types of contamination. The scope of services offered by **Clean Earth Solutions** fall under two major headings. These headings are "Products" and "Services". Under each individual heading are specific areas of expertise that provide our customers with comprehensive programs to prevent, identify, and eliminate contamination liabilities and responsibilities. At **Clean Earth Solutions**, we begin each project analytically, work through it diligently, and finish it to our own high standards, as well as our clients complete satisfaction.

Clean Earth Solutions has a better IDEA

Clean Earth Solutions is proud to offer an exciting technology that allows the fueling industry to remotely manage and track every facet of their fueling systems ! This program tracks ALL CRITICAL DATES and automatically notifies any number of personnel via e-mail.

This program is called; **I**nternet **D**ata **E**xchange **A**pplication, or **IDEA** for short. This program was developed by **Clean Earth Solutions** over the last 9 years in conjunction with on site testing and verification of numerous fueling systems and components.

The **IDEA** can track any information relevant to a fuel site such as;

- All underground storage tank information
- All submersible pump, piping, sump and dispenser information
- Current leak detection systems
- ATG Equipment
- Cathodic protection systems
- Spill and overflow equipment
- Dispenser calibration
- Precision line, leak detector and stage II vapor recovery testing
- Precision tank testing
- SIR management
- Regulatory forms, data and certificates
- Digital pictures
- And much more . . .

The **IDEA** is much more than a simple internet site where digital "copies" of paperwork are posted! It is rather, a **completely interactive** online data base that tracks and notifies a user of critical testing, renewal or other operational dates. Sample screen shots are shown below.
